

Scanfob 2002 Setup for BrokerForce

Scan HID barcode to set Scanfob 2002 as a Bluetooth keyboard

Scan all four barcodes in this box to set Scanfob 2002 Bluetooth scanner to use ~ (tilde) prefix character.

The barcodes below will assist in connecting and disconnecting the scanner.

“Make Discoverable (Pairing)” will allow the computer to find the scanner. You can also hold the small button on the scanner for 5 seconds.

“Disconnect and Radio Off” will turn off the scanner. This can also be accomplished by holding the smaller button on the scanner for 5 seconds while it is connected.

“Reconnect” will connect the scanner to a computer or device that it has already been paired with. You can hold the larger scanning button for 5 seconds to

Make Discoverable (Pairing)
